Software

Task Management:

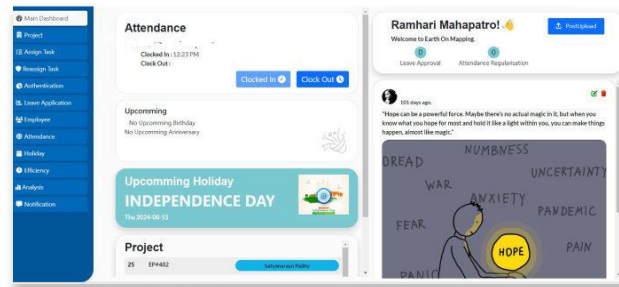

Assign, reassign, and manage tasks efficiently.

Attendance Tracking:

Clock-in/clock-out functionality to monitor work hours.

Leave & Holiday Management:

Easy leave applications and holiday alerts.

Employee Management System

Assign Task / Reassign Task:

Facilitates the delegation of tasks to employees, along with the ability to reassign tasks efficiently.

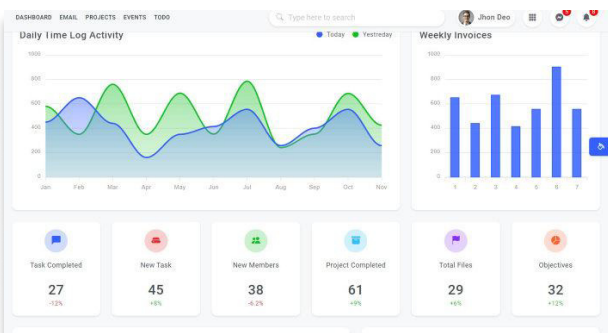

Authentication:

Handles employee verification, likely related to logging in, role management, or user authentication within the system.

Employee Management and Attendance Tracking System Overview:

This software is an intuitive, user-friendly platform designed to manage employee tasks, track attendance, monitor projects, and handle various HR functions like leave applications and holiday tracking. Below are the core features and functionalities visible on the page.

Personalized, social-style post section where users can share motivational quotes, project updates, or important information. For instance, a motivational quote about hope and perseverance is posted, promoting a positive and engaging work environment.

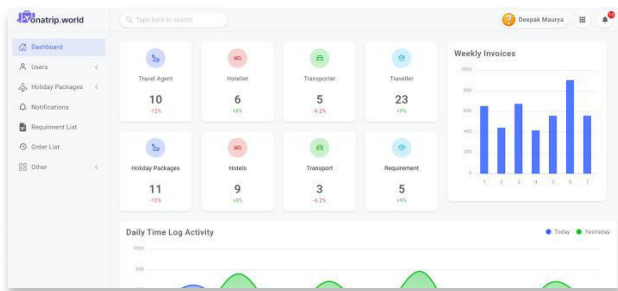

HRMS Human resource management system

Employee Management Dashboard Overview:

This interface is a performance and project tracking dashboard designed to give managers a comprehensive view of daily time log activities, task completions, project progress, and team performance. The dashboard is sleek and data-driven, with visual graphs and key statistics summarized in an easy-to-read format.

Visual Data Presentation: Line and bar graphs for tracking employee activities, project completions, and invoice management.

Performance Metrics: Task, project, and file tracking features help managers monitor team performance and project progress.

Customer relationship management

User Management: Tracks and manages user accounts, including travel agents, hoteliers, transporters, and travellers.

Holiday Packages: Displays information on available holiday packages, including bookings and cancellations.

Notifications: Displays important notifications and alerts related to bookings, payments, and other activities.

A comprehensive platform for managing various aspects of the travel industry.

It provides a centralized view of user activity, including travel agents, hoteliers, transporters, and travelers. The dashboard allows for efficient tracking and management of holiday packages, bookings, cancellations, and customer requirements. Additionally, it offers features such as notifications, order lists, and other tools relevant to the travel business. By providing real-time data and analytics, the dashboard empowers users to make informed decisions, optimize operations, and enhance customer service.

Ecommerce Management System

Sales Analytics: Tracks sales performance, revenue, and customer behavior.

Inventory Management: Monitors stock levels, product availability, and reorder points.

Order Processing: Manages order fulfillment, shipping, and returns.

Customer Relationship Management (CRM): Tracks customer interactions, preferences, and loyalty.

Improved Efficiency: Streamlines e-commerce operations and reduces manual tasks.

Enhanced Decision-Making: Supports data-driven decisions based on real-time analytics.

Increased Customer Satisfaction: Enables personalized experiences and efficient order fulfillment.

Optimized Inventory Management: Prevents stockouts and overstocking, reducing costs.

Hospital Management System

Patient Registration: This section might be used to register new patients.

Appointments: This section could be for managing appointments and scheduling.

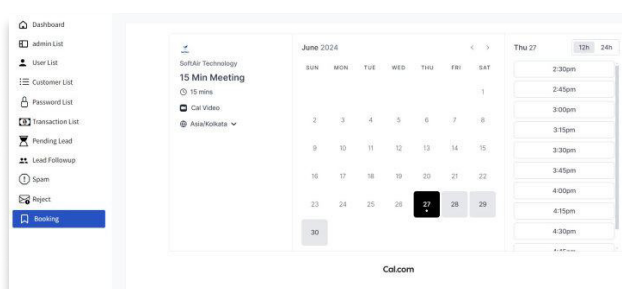

Department: This might indicate a section for managing different departments within the medical practice.

Emp. Performance: This could be a section for tracking employee performance.

Users: This might list users or staff members with access to the system.

Diagnostic: This could be a section for managing diagnostic tests or procedures.

Authentication: This might be related to user authentication and security.

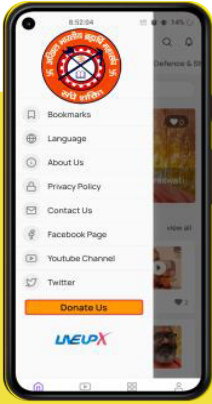

Lead Management System

Lead Capture: This system likely has features to capture and store information about potential patients or clients, such as contact details, demographics, and inquiries.

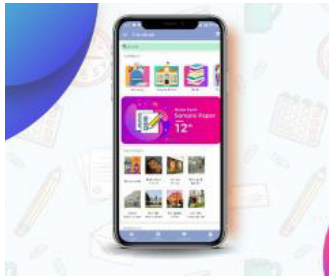

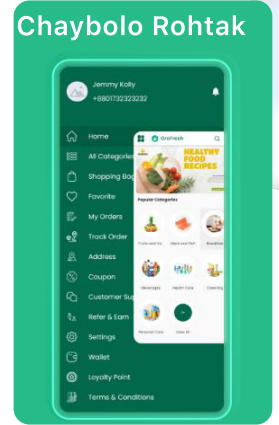

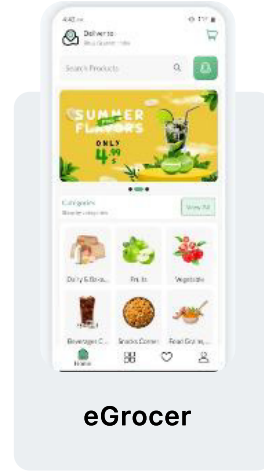

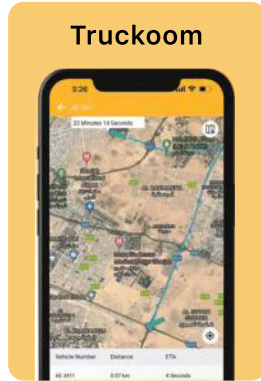

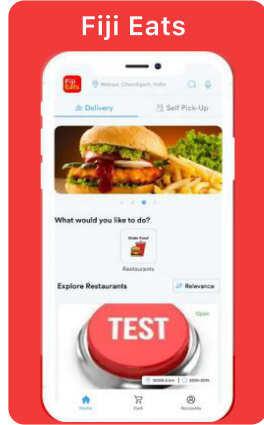

Lead Qualification: It may include tools to qualify leads based on various criteria, such as their needs, budget, and likelihood of conversion.

Lead Assignment: Leads can be assigned to specific team members or departments for follow-up.

MELLOW FOX STUDIOS

At Mellow Fox Studios, we're on a quest to redefine the gaming industry. We're about innovation, creativity, and technical mastery.

Our Games

At Mellow Fox Studios, every game we create is a journey into the extraordinary. From epic fantasy worlds to futuristic cities, our games are designed to captivate, challenge, and inspire. We believe in pushing the boundaries of what's possible, blending breathtaking visuals with innovative gaming mechanics.

VISION

At Mellow Fox Studios, we're on a quest to be the top fox in the gaming industry. We're all about innovation, creativity, and technical mastery. Our goal is simple: make games that not only meet but blow away your expectations. Think rich narratives, stunning visuals, and gameplay so engaging you'll need a reminder to eat.

[WATCH TRAILER](#)

Did we mention we were featured in the "Startup Maharashtra" by the Government of India? That's right! We made our mark among the brightest startups in the country, and we're just getting started. Who knew foxes could be so savvy?
